## **DETAILED ACTION**

### ***Response to Election***

The examiner is in receipt of applicant's response to office action mailed 3/24/2005, which was received 8/11/2005. Acknowledgment is made to the election of Group IIA, claims 10/11/12/13/23/24 and 25 without traverse.

### **Examiner's Note**

Examiner has cited particular columns and line numbers or figures in the references as applied to the claims below for the convenience of the applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant, in preparing the responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.

### ***Claim Rejections - 35 USC § 112***

Claim 10 recites the limitation "the product" in the third sentence. There is insufficient antecedent basis for this limitation in the claim.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3625

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

**Claims 10-13,23-25 are rejected under 35 U.S.C. 102(e) as being anticipated by Perkowski (6,961,712).**

In regards to claims 10-13,23-25, Perkowski teaches all the features of the instant claims. For instance, Perkowski discloses A consumer product information requesting (CPIR) enabling Servlet for execution on the server-side of an information network such as the Internet. The CPIR-enabling Servlet comprises a Universal Product Number (UPN) a uniquely associated with a particular consumer product on which an information search is to be carried out within a database management subsystem. One or more classes are loaded on a an Internet-enabled information server. When the consumer selects a CPIR-enabling Servlet tag embedded within the WWW and corresponding CPIR-enabling Servlet, a UPN-directed-search is automatically carried out within the database management subsystem, the a graphical user interface (GUI) is displayed within the Internet-enabled browser program used by the consumer, and the results from the UPN-directed search are displayed within the GUI in the form of a menu of categorized URLs pointing to consumer product related information resources published on the WWW, without disturbing the consumer's point of presence thereon.

Art Unit: 3625

The CPIR-enabling Servlets can be used to build various types of consumer product information systems for operation on the WWW (see abstract, and FIG 2A).
